

Aromasil AROMASIL

Growth & Performance

Application

Herbal Prebiotic for Supporting Appetite and Performance

Active ingredient	Target species
Aromatic essential oils	Poultry
Therapeutic category	
Growth & Performance	

Mechanism of action

Aromasil is a powdered form of aromatic essential oils with a biological stabilizer. By activating the appetite axis and stimulating olfactory and taste receptors, it supports regular feed intake in livestock, especially during transition and heat stress.

Benefits for the flock

- Supports regular feed intake
- Helps mask the taste of less-palatable ration ingredients
- Supports uniform herd performance

Safety note: The above figures are general product consumption guidelines, not a treatment protocol. Product selection, quantity, and duration of use are always determined by the flock's responsible veterinarian and the product label; these products are supportive supplements and are not a substitute for treatment or vaccines.
