

Digestive

Application

Herbal Support in the Management of Necrotic Enteritis

Active ingredient	Target species
Carvacrol	Poultry
Therapeutic category	Botanical source
Digestive	Savory

Mechanism of action

Carvasil combines thymol, carvacrol and linalool. In the scientific literature these essential-oil phenols are recognized for supporting balanced gut microflora, digestive mucosal integrity and resistance to enteric inflammation.

Benefits for the flock

- Supports balanced gut microflora
- Helps maintain mucosal integrity and litter quality
- Supports better feed conversion through healthy digestion

Safety note: The above figures are general product consumption guidelines, not a treatment protocol. Product selection, quantity, and duration of use are always determined by the flock's responsible veterinarian and the product label; these products are supportive supplements and are not a substitute for treatment or vaccines.
