

Liver & Metabolism

Application

Poultry Liver Protector and Regenerator

Active ingredient

Silymarin

Target species

Poultry

Therapeutic category

Liver & Metabolism

Botanical source

Milk thistle (Silybum marianum)

Mechanism of action

Silymarin, the flavonolignan complex from milk thistle (Silybum marianum), is the best-known botanical for liver support and is described in the scientific literature for its antioxidant protection of hepatocytes and its contribution to normal liver function.

Benefits for the flock

- Supports normal liver function during rapid growth
- Antioxidant support for liver tissue
- Aids flock recovery after intensive medication periods

Safety note: The above figures are general product consumption guidelines, not a treatment protocol. Product selection, quantity, and duration of use are always determined by the flock's responsible veterinarian and the product label; these products are supportive supplements and are not a substitute for treatment or vaccines.
