

Mentosil MENTOSIL

Respiratory

Application

Specialized Poultry Mucolytic

Active ingredient	Target species
Menthol	Poultry
Therapeutic category	Botanical source
Respiratory	Peppermint

Mechanism of action

Mentosil is a synergistic blend of natural essential oils with menthol. In the scientific literature these compounds are recognized for a mucolytic effect (thinning secretions) and for supporting clearance of the airways, providing supportive value during environmental challenges in the house.

Benefits for the flock

- Supports comfortable breathing in the flock
- Supportive help during in-house environmental challenges
- Usable alongside ventilation management programs

Safety note: The above figures are general product consumption guidelines, not a treatment protocol. Product selection, quantity, and duration of use are always determined by the flock's responsible veterinarian and the product label; these products are supportive supplements and are not a substitute for treatment or vaccines.
