

Neurosil

NEUROSIL

Stress Management

Application

Herbal Support in Managing Stress and Heat Stress

Active ingredient	Target species
Linalool	Poultry
Therapeutic category	Botanical source
Stress Management	Lavender

Mechanism of action

Neurosil is based on linalool (the signature compound of lavender), eugenol and vitamin C. In the scientific literature these compounds are recognized for modulating the stress response, lowering cortisol and providing antioxidant support, offering supportive value during heat stress, high stocking density and transport.

Benefits for the flock

- Supports flock calm during heat stress
- Helps ease the transition through handling and vaccination
- Supports consistent feed intake under stressful conditions

Safety note: The above figures are general product consumption guidelines, not a treatment protocol. Product selection, quantity, and duration of use are always determined by the flock's responsible veterinarian and the product label; these products are supportive supplements and are not a substitute for treatment or vaccines.
