

Digestive

Application

Herbal Support in the Management of Poultry Coccidiosis

Active ingredient	Target species
Artemisinin, Carvacrol	Poultry & livestock (calves, lambs, ewes)
Therapeutic category	Botanical source
Digestive	Artemisia

Mechanism of action

Parasil is built on a artemisinin and carvacrol. In research these compounds have been studied for supporting intestinal mucosal health and for natural antimicrobial activity during enteric challenge, serving as a supplement to the gut-health management program.

Benefits for the flock

- Supports intestinal health during enteric challenge
- Helps maintain digestive mucosal integrity
- A supplement to the gut-health program, alongside veterinary guidance

Safety note: The above figures are general product consumption guidelines, not a treatment protocol. Product selection, quantity, and duration of use are always determined by the flock's responsible veterinarian and the product label; these products are supportive supplements and are not a substitute for treatment or vaccines.
